Privately Funded Organisations – a 50% deposit will be required prior to manufacture of your order. This payment is due within

14 days of placing your order and a proforma invoice will be sent upon order. The balance of your invoice will be due on completion with funds being received within 14 days. Credit is subject to status and Credit Insurance application.

Invoicing – We will send you an invoice a few days prior to completion to facilitate payment. If you require invoicing before this, please let us know.

School Holidays – where a project is scheduled to be completed during a school holiday and where payment cannot be made during the holiday, and within agreed payment terms, an invoice will be issued in advance. If you are unable to meet the agreed payment terms because of school holidays, we will ask for part payment of the invoice prior to the project commencing. This is particularly applicable to the 6-week summer holiday.

2.) Cancellation

Following receipt of a signed order form, we will process your order and issue an email sales order acknowledgement.

The customer may cancel the order, at no cost, within 5

days of issue of the sales order acknowledgement email. Cancellation requests must be received in writing.

If the customer wishes to cancel after 5 days of issue of the sales order acknowledgement email, then 50% of the order value will be payable.

In any event, if the customer wishes to cancel the order within 14 days of the notified installation date, then 90% of the order value will be payable.

3.) Postponement

You may request to postpone the project by contacting Creative Play in writing if notification is received at least 14 days prior to the notified installation date. Where a postponement is requested less than 14 days before the notified installation date then abortive fees of 10% of the order value would be incurred.

The project cannot be postponed for more than 6 months from the date of issue of the sales order acknowledgement email. Where projects are not started within 3 months, the full amount of the project value will become payable.

Where products have been manufactured ready for installation, we may ask you to make payment for the value of the products less the installation charges.

4.) Planning Permissions

Planning permission is not usually required for playground equipment developments; however, it is the customer's responsibility to check whether there are planning permission requirements for their project as restrictions differ dependent on location, planning authority and permitted development.

5.) Site Security & Welfare

Unless stated otherwise within our quotation, no allowance has been made for site security and welfare facilities.

Our installation teams will use a 1m high temporary orange mesh fence to identify the area of works. Should more substantial, metal Heras fencing be required this can be arranged at an additional cost - £275 ex VAT per project to cover delivery, hire costs, assembly and dismantlement costs.

If you are unable to provide welfare facilities for the installation team, a temporary toilet can be provided at an additional cost - £275 ex VAT per project.

Please notify us at the point of order if you would like to add these to your order.

6.) Waste Disposal

Our quotation includes for all waste disposal off site to an approved waste management facility and within waste management legislation.

Where you have requested that spoil and waste be left on site to achieve a cost saving, this spoil will be left neatly next to the area of works.

Please note we are required to use 3rd parties for delivery and collection of skips or waste grab wagons and as such cannot guarantee collection dates following completion.

7.) Groundwork Preparation

Where groundwork preparation is required, and the

KEY CONSIDERATIONS

customer has chosen to complete works themselves or using a 3rd party contractor, these must be carried out to Creative Play's specification (available on request). Please contact us for details if you are unsure.

8.) Access route and reinstatement

Whilst all care will be taken to minimise disruption and damage along the access route. To carry out your project we need to ensure we can get deliveries, materials, skips, plant and installation labour to the area of works. Unless stated otherwise within our quotation, no allowance for ground protection or reinstatement is included. We will always endeavour to leave the site as tidy as possible and limit any damage.

It is the customers responsibility to ensure that Creative Play have continuous access to the area of works and set up areas during the installation period and within usual operating hours (Monday – Friday 07:30 – 17:00).

9.) Drainage & Suitability of Location

Creative Play cannot assess the suitability of an area for playground equipment with regards to drainage as we cannot observe the area throughout the year. There is often a significant period between initial site consultation and installation, Creative Play cannot accept any responsibility for the drainage properties of an area and the customer should determine whether a location is suitable for playground equipment or safety surfacing to be installed, we will of course provide advice to the best of our abilities.

10.) Underground Services

Whilst all care is taken, including a CAT survey (cable avoidance tool), we are unable to identify all underground

services prior to installation. Where possible the Customer should provide drawings and plans of underground services (water, drainage, electricity, gas). Creative Play cannot accept any responsibility for damage caused to underground services.

11.) Maintenance/BSEN1176

As a playground operator you are required to ensure that your playground is maintained and regularly inspected. Your playground will be installed to the requirements of BSEN1177/1177 and signed off by one of our Project Managers. Independent post-installations inspections can be arranged for a cost of £499 ex VAT.

Creative Play offer ongoing service and inspection services to help you ensure that your playground is safe and well maintained. For more details, please contact us or visit our website.

12.) Safety Surfacing

Safety Surfacing is a requirement under BSEN1176/1177 in some circumstances and can be used as a great addition to your playground. There are some limitations of these products that you should be aware of:

a) Engineered Sub-base – safety surfaces should always be laid onto a compacted, free-draining, stone sub-base including a weed-suppressing geotextile membrane. The exception to this is grass matting which is designed to be laid directly over the existing grass surface.

b) UV Discolouration of EPDM Wetpour – on rare occasions and subject to certain environmental conditions (bright sunshine, warm weather) wetpour surface are subject to UV discolouration during the laying process which presents as a yellowing of the polyurethane binder. This yellowing can temporarily change the aesthetics of the surface and is more

prevalent when using certain colours (blue, green, white, beige), although all colours can be affected.

Creative Play recommend using colours which are less susceptible such as terracotta red, earth yellow and black/colour mixes which can reduce the chance of discolouration becoming apparent. This is a limitation of the laying process and cannot be avoided, please discuss this with your Play Advisor or Project Manager if you have concerns.

c) Rubber Mulch surfacing uses a recycled rubber tyre shred which is then colour-coated. As such the colour-coating will wear over time and expose the black rubber changing the colour of the surface. Additionally, the black tyre material can result in carbon colour transfer which can result in staining of skin and clothes. We do not recommend the use of rubber mulch surfacing in Early Years environments or in areas where children will regularly be sitting or crawling on the surface.

d) Drainage – whilst Creative Play will always ensure that safety surfaces are laid onto a compacted, free draining stone sub-base, this sub-base will not change the drainage properties of the area. If the space chosen for the play equipment or surface regularly floods, has a highwater table or is particularly wet the sub-base will not change these drainage properties.

Creative Play cannot be held responsible for any issues arising with UV discolouration, Colour/Carbon Transfer or poor drainage. Please speak to your Play Advisor or Project Manager if you have concerns about the drainage in the area of proposed works.

e) Repairs & Overlays – where older surfaces are repaired as part of your project, we are unable to offer a warranty. Patch repairs and Edging repairs require a new material to adhere to an old material and this join may fail in a short period of time. Where surface is overlaid with a new surface we are unable to offer a warranty as the old surface which is being overlaid may fail.

10.3 Creative Play may increase the price of the Equipment and/or Services, by giving notice to the Customer at any time before delivery, to reflect any increase in the cost of the Equipment to Creative Play that is due to:

a) any factor beyond the control of Creative Play (including foreign exchange fluctuations, increases in taxes and duties, and increases in labour, materials and other manufacturing costs);

10.6 Where a Deposit is requested, Creative Play shall be under no obligation to take any further steps with regards the project until such time as the Deposit has been paid in cleared funds.

10.7 The Customer shall pay the price (or the balance of the price) for the Equipment and/or Services immediately upon Completion.

10.8 If the Customer identifies snagging, defects or post-completion issues, the Customer shall be entitled to retain a maximum of 10% of the price pending those matters be resolved.
